IOWA CERTIFIED SWPPP DESIGNER (ICSD)

Register Online
Course Fee: $155
Certification: 3 Years
PDHs: 5.5

Easy and Convenient, On-Demand **eTraining**

Iowa Certified Stormwater Pollution Prevention Plan (SWPPP) Designer *eTraining*

Course ID: ICSD-01

The ICSD eTraining provides the same content as the live training event but made more convenient for you to complete on demand and at your own pace. The certification is designed for for those who prepare (design), review and approve Stormwater Pollution Prevention Plans (SWPPPs). From the first disturbance of soil to final stabilization with sod or seed and everything in between, the SWPPP guides all construction site erosion control and pollution prevention activities on a construction project.

Participants will learn regulatory requirements for General Permit No. 2, erosion and sediment BMPs, and good housekeeping practices to prevent stormwater pollution for different construction phases. Participants will learn the 6 phases for preparing a SWPPP and how to implement it at a construction site through pre-recorded class exercises that review SWPPP narratives and site plans.

The eTraining course features over 3.75 hours of on-demand video content, learning checks, interactive exercises, and the ICSD certification exam. All course materials and handouts are available to download.

CERTIFICATION PROCESS

Complete the ICSD eTraining, pass the certification exam and sign the Code of Ethics to become certified. Those that are certified are recognized statewide for their credentials to prepare stormwater pollution prevention plans for construction sites. There are no continuing education requirements but recertification is required every 3 years.

WHY GET CERTIFIED?

Individuals that have completed the ICSD program are acknowldeged as having the understanding of SWPPP preparation to meet NPDES and General Permit No. 2 compliance in Iowa. ICSD candidates have met the requirements to gain professional recognition in SWPPP design and can indicate the qualification on GP#2 documentation.

This training program is developed by the Iowa Stormwater Education Partnership and supported by partner cities and professional members. Learn more at www.IowaStormwater.org.
