

# NEW EVENT!

## Advanced Topics in Construction Site Runoff Control Webinar

### Construction Site Sediment Basins & Dewatering Practices

#### Program Topics

- Proper configuration and sizing of sediment basins
- Basin dewatering techniques
- Use of flocculants to enhance setting
- Sediment basin maintenance considerations
- Construction site dewatering methods and practices

#### Registration Minimum

10 registrants

#### Course Instructor

Mike Perez, CPESC  
Assistant Professor, Iowa State University  
Dept. of Civil, Construction & Environmental  
Engineering

Dr. Perez conducts large-scale performance-based testing and evaluation of construction site erosion and sediment control practices such as storm drain inlet protection, ditch checks, sediment basins, sediment barriers, rolled erosion control products, and surface skimmers. He currently serves as the chair of the standards and practices committee for the International Erosion Control Association.

#### Cancellation Policy
