

Iowa Stormwater Education Partnership

Our Mission: Engage community leaders on how to improve & utilize diverse water resources to grow thriving, healthy, and resilient communities.

Professional Membership

MEMBERSHIP PROVIDES ACCESS TO:

HIGH QUALITY EDUCATIONAL MATERIALS

ISWEP Professional members have access to educational resources created for city members with regulated stormwater programs. Participating in a local educational event? You have access to "Gill" the life-size bluegill mascot, watershed models for kids, and a "water" wheel of fortune, and other checkout items.

TRAINING & CERTIFICATIONS

The Partnership also develops and implements a variety of training for city staff, stormwater design professionals, and erosion and sediment control inspectors and installers. We are your go-to experts for stormwater training in Iowa and work with statewide partners to implement training events. And we make it **easy and convenient** for you with in-person and virtual training and certification events, eTraining opportunities for on-demand learning, and an annual IStorm Conference.

BENEFITS OF MEMBERSHIP

Members have access to our library of educational materials on the ISWEP website, a monthly newsletter with member, state and national news, regulatory updates, and networking opportunities. Professional members also receive a **%20 discount on training for staff.**

How We Work For You, and Your Employees

The Iowa Stormwater Education Partnership (ISWEP) is a non-profit organization committed to **protecting Iowa's rivers, streams, and lakes by improving stormwater quality** in Iowa through education, certification and training programs.

Responsive and Supportive Staff

Our membership consists of communities across Iowa, most of which have permitted Municipal Separate Storm Sewer Systems (MS4s). It also includes non-regulated cities, counties, stormwater professionals, educational groups, and individuals.

U.S. Environmental Protection Agency Phase II MS4 stormwater regulatory requirements prompted our founding in 2005. More than 15 years later, our twofold goal then remains the same today: **support local stormwater and urban watershed programs through unified education and outreach delivered statewide.**

Through these goals we can achieve our mission of enabling Iowans to value and improve water quality.

Training and Workforce Development

Permit and Regulation Support
