

Weathering the Storm: Adapting Together for Resilient Communities

April 22-23, 2026

Maucker Union, Cedar Falls, IA

Call for Presentation Abstracts

The Iowa Stormwater Education Partnership (ISWEP) invites you to submit abstracts for IStorm 2026, Iowa's premier stormwater conference.

IStorm 2026 will bring together stormwater professionals from across the industry to share knowledge, celebrate successes, and build community resilience. This year's conference explores how infrastructure and people alike rise to meet today's stormwater challenges, honoring the dedication of environmental professionals who continue advancing water quality protection throughout Iowa. Whether you have a technical breakthrough, a successful case study, research findings, or lessons learned, we want to hear from you.

All presentations will be 30-minute slots. While we welcome abstracts on all aspects of urban stormwater management, we're particularly interested in:

- Innovative practices and technologies
- AI applications in stormwater management
- Resilient infrastructure design
- Regulatory updates and compliance strategies
- Community engagement and education
- Climate adaptation strategies
- Green infrastructure successes
- Streambank stabilization and floodplain management
- Watershed management approaches
- Workforce and career development
- Ethics in stormwater management

Abstracts should be 750 words or less and include your presentation title, name, contact information, and organization. If you are presenting similar content at the Iowa Water Conference, please disclose this in your submission and highlight how the IStorm presentation will offer distinct or expanded information.

Submit by October 15, 2025 to: iswepadmin@iowastormwater.org

Notification of acceptance: November 15, 2025
